If it is a bigger number than the current one you know it is later Denzil, No the SpeedTouch is rather different to other routers that I am familiar with.. Where could i download a standard piece of firmware Regarding firmware versions, Thomson in their wisdom don't give version numbers that correspond to what you see in the router! Anyway, if I can't get iChat AV to work because of another screw up with binding of SIP in the ST, I'll chuck it in the bin and use a Netgear.. As this is a network router, rather than a USB modem it doesn't need any drivers or software running on your PC.. Normally you click an 'upgrade firmware' button and tell it the location of the downloaded file.. If all else fails, read the manual Where did you download the firmware from?An official site should tell you the version number. 34bbb28f04 [Muat Turun Al Quran Free Full For Mobile Android](#)
